## Investment Strategy

To achieve the stated objectives, the Class may be invested in large-to-mid-capitalization common shares, dividend-paying equities and other Canadian and, as appropriate, U.S. and international securities such as ETFs with both lower systematic risk and higher expected returns through capital appreciation, dividend income, or a combination of both. To optimize the Class portfolio for current market conditions, the portfolio manager may change sector and geographic allocations, as well as tactical approach and investment style. Tactically, the portfolio manager will typically sell covered call options on securities held directly in the Class portfolio or that can be acquired through various derivative strategies, but may also buy puts to hedge against downside market movements, write cash-secured puts to acquire shares, or buy calls as a stock replacement strategy. The Class may also utilize leverage to a maximum of 20% in aggregate (at the time of incurring leverage) of the portfolio’s asset value.

## Who can purchase the pool?

Pools may be purchased by licensed Portfolio Managers and accredited investors only.

## Liquidity

The Class is available for withdrawal and is not subject to any deferred sales charges. Transactions in the Class occur only when the net asset value (NAV) is calculated at the close of every Wednesday and last business day of each month and quarter.

## Suitability and Risk Profile

The Class employs complex investment strategies and tactics, and is only suitable for investment proportionally within an approved Croft Mandate and/or by accredited investors. Financial markets can be risky over short periods. Longer term investors benefit from time, which tempers the effects of market volatility. A longer time horizon reduces the chances of losing money and enhances the odds of earning a return close to the long-term average.
