

All-Star Managers Global Select – Conservative

CFG Model Portfolio

October 30, 2020

Portfolio Description

The All-Star Managers Global Select Portfolios are a series of diversified fund portfolios tied to the individual risk tolerances and return needs of investors. The portfolios employ a multi-manager approach, providing access to a wide variety of investment styles and methodologies, and thereby reducing the risk of investing with one manager who may underperform in any given year. R N Croft Financial Group (CFG) is the investment manager responsible for the selection of the underlying funds and managers, and the optimization of the individual fund weightings within each portfolio.

The objective of the All-Star Managers Global Select Conservative Portfolio is to provide Canadian investors with a globally diversified Canadian dollar portfolio that complements the stability of a higher allocation to fixed income funds with the consistent capital gains biased investment appreciation of its smaller equity fund selection. As such, this Conservative Portfolio is designed to be a lower-risk investment best suited to less risk-tolerant investors who are focused on conservatively building their investment assets and may also need to withdraw from their portfolio.

To achieve this objective, the All-Star Managers Global Select Conservative Portfolio includes funds selected based on a number of key factors including, but not limited to, a long-term record of consistent performance. In addition, CFG regularly evaluates each fund for structure, quality and performance to detect any material changes that could affect the funds themselves and the overall portfolio mandate, and may change individual fund selection or allocation within the portfolio based on market fluctuations and market outlook.

Portfolio performance is tracked against the Financial Post FPX Income benchmark*, which is a broad, globally diversified Canadian dollar model portfolio that has shown enhanced capital protection and reliable returns since its 1997 inception.
